RE: NC Superfund Comments
Final Revised Work Plan
Sites 9 and 54
MCB Camp Lejeune

Dear Ms. Landman:

The Superfund Section received and reviewed these documents and has the following comments:

1. Page 2-1, Project Objectives. What are the remediation goals for the contaminated soil excavation? The soil-to-groundwater pathway needs to be considered.
2. Page 5-1, Excavation and Confirmatory Sampling. Confirmatory sampling should include volatile, semi-volatile, and metal analyses. The proposed analyses, gasoline range organics, diesel range organics, and oil and grease concentrations, are not necessary for a Superfund cleanup.

We appreciate the opportunity to review this document. If you have any questions or comments, please contact me.

Sincerely,

David J. Lown, LG, PE
Geological Engineer
Superfund Section

cc: Neal Paul, MCB Camp Lejeune
